EDUCATION

Arizona State University – School of Computing and Augmented Intelligence

Master of Science in Computer Science, GPA: 3.89/4

Tempe, AZ
Aug 2024 – Present

International Institute of Information Technology, Hyderabad

Bachelor of Technology (Honors) in Computer Science and Engineering, GPA: 8.6/10

Hyderabad, India
2019 – 2023

TECHNICAL SKILLS

Languages: C, C++, Python, Java, SQL, JavaScript, TypeScript, Bash

Frameworks: React, Node.js, Express, Spring Boot, Flask, GraphQL

Databases: DynamoDB, MongoDB, MySQL

Cloud & Tools: AWS (Lambda, DynamoDB, S3, IAM, Bedrock), GCP (BigQuery, Cloud Run), Docker, Git, CI/CD

EXPERIENCE

Amazon Web Services

Software Development Engineer Intern

May 2025 – Aug 2025
Seattle, WA

- Designed a recommendation portal in **React, TypeScript** for developers to discover and compare tools and frameworks for building web services. Utilized UX Design Principles and **Cloudscape** components for an intuitive interface.
- Implemented backend services in **Java + GraphQL** with **DynamoDB**, ensuring scalable storage and retrieval.
- Accelerated developer onboarding by reducing tool discovery time from **1.5 minutes to 10s**, directly improving productivity for 100k builders.

Perceptive Analytics

Analyst

Jun 2023 – Jun 2024
Hybrid

- Scaled a **retrieval-augmented generation chatbot** to handle **1K+ queries/day** using AWS Lambda + Streamlit, improving system reliability and accessibility.
- Automated market trend reports, reducing analyst research time by **40%** and cutting manual workload by 25 hrs/week.
- Deployed serverless dashboards providing real-time insights across SEC and proprietary datasets for financial analysts.

Subtl.ai

NLP Engineer

Dec 2022 – Feb 2023
Hyderabad, India

- Deployed a multi-user chatbot for financial documents, decreasing manual analysis workload by **90%**.
- Drove Agile sprint delivery by launching production-grade NLP features biweekly (entity extraction, document querying), shortening research time by **40%**.
- Built CI/CD pipelines in **Jenkins** and containerized deployments with **Docker**, ensuring reliable releases.

RELEVANT PROJECTS

STEAM SuperHeroes Mentor-Mentee Platform — Python, Flask, AWS (Lambda, DynamoDB, S3)

Oct 2024 – Feb 2025

- Developed dashboards for real-time performance tracking, driving actionable insights that increased engagement by **30%**.
- Designed an optimal mentor-mentee assignment system handling 6 different field constraints and 340 average weekly requests.
- Secured **2nd place** at Opportunity Hack 2024.

C-Shell (She Sells C Shells) — C++

Sep 2022

- Implemented an advanced Linux shell in **C++** supporting I/O redirection, piping, and custom signal handling.
- Adopted by **50+ users** for enhanced scripting and process management; extended **xv6** with priority-based and MLFQ scheduling.

Job Searching Web Application — React.js, Node.js, Express, MongoDB

Jan 2022 – Mar 2022

- Built a full-stack portal enabling 200+ students to apply for jobs with a real-time **React dashboard**.
- Implemented fuzzy string matching to enhance job search accuracy and user experience.

Wikipedia Search Engine — C++, Python

Jun 2021

- Engineered a multi-threaded indexer and search engine for **500K+ Wikipedia articles**.
- Implemented the **BM25 ranking algorithm**, achieving sub-**0.1s latency** for top-5 search results.

ACHIEVEMENTS

2nd place at Opportunity Hack 2024: Built a mentor-mentee scheduling system with AWS serverless infrastructure.

Teaching Assistant, ASU (Spring 2025): Mentored 50+ students and guided projects in *Topics in Natural Language Processing*.

Publications: Published peer-reviewed papers at top conferences including [ACL](#) and [LREC](#).
